

柯俊明周报

2016.1.4-2016.1.10

This week my main works are as follows:

- Assisting Junhua Lu in writing **Predictive Visual Analytics**.
- Preparing for the project of **Criminal Forecast**.

Monday-Tuesday- Wednesday- Thursday- Friday

I have gone to the T-gram company, and watch for the Windows Server:

The Windows Server's memory is 80 GB, storage space tops out at 1 TB, including virtual hard disk for is 500 GB.

And I have selected one million people's identity numbers. Export their information with CSV files.

Saturday-Sunday

I have checked the survey of Predictive Visual Analytics with Junhua Lu, Zongzhuang Li, Yuxin Ma, finally we send the corrected survey to Ross Maciejewski and waiting for his message.
